Full-Stack Web Developer with a background in Business Administration - Management information Systems. Pending graduation at the UNC Chapel Hill Coding bootcamp in late September where I acquired hands-on experience in JavaScript, CSS, HTML5, React, and responsive web design. Prior positions have been in person and online which has allowed me to grow my time management skills and the ability to connect and communicate with peers.

Technical Skills

Responsive Design: HTML, CSS, Bootstrap

Dynamic Design: JavaScript, jQuery, & Ajax

Version Control: Git, Terminal/Git Bash

Server-Side: Node & Express

Database: MySQL, MongoDB, Snowflake, Sequelize

Cloud-Based Deployment: Heroku

Authentication: Express-Session & Cookies

Projects

Concert Finder | <https://github.com/DanielCConlon/concert-finder> | <https://danielcconlon.github.io/concert-finder/>

- An application that allows users to search upcoming tours in their city for numerous artist as well as display artist albums they have worked on, users can also click on the album to be brought to the albums itunes page to get more information.
- Lead Developer of the group of four
- Tools/Languages: Utilized Githubs Kanban and Issues for project management, HTML, CSS, JavaScript, and LocalStorage.

Travel Blog | <https://github.com/gilnamcbride/travel-blog> | <https://sheltered-cliffs-36049.herokuapp.com/>

- An application that allows users to write about their experiences and read about other users' vacations and explorations. Users can search for specific posts and be shown images of the location and all posts related to the location.
- Collaborated with 2 other developers being in charge of the front-end JavaScript
- Tools/Languages: Utilized Githubs Kanban and Issues for project management, HTML, CSS, JavaScript, Pexel API, Node.js, Express.js, Express-Session, Express-Handlebars, Sequelize.

Work Experience

PennyMac Loan Services

03/2021 - 06/2022

Associate Product Analyst (Rotational Program)

Cary, NC

- Document Services: Maintained/Added required initial disclosure documents to a master document. Worked with third party stakeholders to make sure the correct documents were in the Docutech directory.
- Data Management: Aided in migrating processes from MS SQL to SNOWFLAKE. Directed offshore team members on which processes to migrate and checked over work.
- Broker Experience: Worked on Front end software gathering requirements for an in house rules engine to check for required fields on broker documents. Gathered requirements for updating the broker workflow.

FlyWheel Technologies

Fall 2020
